

SAKSHAM TAPADIA

✉ sakshamtapadia10@gmail.com ☎ +91 8058123877  [Github](#)  [LinkedIn](#) </> [Leetcode](#)

I am a passionate **developer** with strong internship experiences and building **scalable** applications. Achieved **1600+** rating on **LeetCode**, placing in the top **30%** globally with **525+** problems solved.

EDUCATION

JECRC University

Jaipur, India

B. Tech Computer Science and Engineering | **Current CGPA: 8.96/10**

2022 - 2026

Coursework: Operating Systems, Machine Learning, Data Structures, Algorithms, DBMS, Computer Networks

WORK EXPERIENCE

Celebal Technologies

June 2025 – Aug 2025

Data Science Intern

- Developed and deployed a Spam Email Detection model using NLP and supervised ML algorithms (Naive Bayes, Logistic Regression), achieving **95%+ accuracy** and reducing false positives by **80%**.
- Designed and optimized end-to-end ML pipelines covering preprocessing, feature engineering, model training, and evaluation, ensuring production-readiness.
- Collaborated with senior data scientists in sprint reviews, model validation, and code reviews, aligning project outcomes with **industry-standard ML practices**.

Samatrix Consulting Pvt. Ltd.

May 2025 - June 2025

Data Science Intern

- Performed **EDA, regression modeling, and visualization** on diverse datasets, delivering actionable insights.
- Automated data cleaning & preprocessing in Python, reducing analysis turnaround time by **30%**.
- Built predictive models that improved forecasting accuracy and **supported data-driven decisions**.

Ozibook

Feb 2024 - May 2024

Intern

- Automated LinkedIn scraping & reporting in Python, cutting reporting time from **60 mins to <10 mins** and reducing **manual effort by 80%**.
- Worked with **3 teams** (10+ members each) and accelerating project delivery.
- Streamlined dashboards & workflows with BA/DA teams, boosting **cross-functional efficiency**.

PROJECTS

HypeTrack | Flask, BeautifulSoup, Pandas, NLTK, Regex, Google Trends API, YouTube API, Twitter Scraper

[GitHub](#)

- Constructed a scalable ML-powered web app** that analyzes real-time trends from **YouTube, Google Trends**, and **Twitter** using **web scraping, NLP**, and **Flask APIs**. Designed robust pipelines achieving **90% relevance accuracy, 40% faster insights**, and production-grade **efficiency**. Integrated a responsive **React.js** frontend, showcasing strengths in **system design, solution engineering** and **code quality**.

CrediSure – Risk Analysis Tool | CatBoost, scikit-learn, Streamlit

[GitHub](#)

- Built a credit default risk prediction pipeline using CatBoost & scikit-learn**, achieving 92.4% accuracy (AUC-ROC 0.97) **with time-based splits, target encoding, and robust scaling on real-world fintech data**.
- Invoice Generator – Responsive Web**

Vivid Frame | PyTorch, YOLOv8, FastAPI, OpenCV

[GitHub](#)

- Built a real-time object detection pipeline using PyTorch + YOLOv8 with **<50ms latency**, optimizing GPU inference via CUDA to boost processing speed by **40%**.

SKILLS

Programming Languages: Python, C/C++, SQL

AI/ML: PyTorch, TensorFlow, Hugging Face, Scikit-learn, Pandas, NumPy

Tools & Platforms: AWS, Git/GitHub, MySQL, Power BI, VS Code, Jupyter, PyCharm, Excel

CS Fundamentals: Linux, TCP/IP, Data Structures, Algorithms, CN, Agile Development

Soft Skills: Abstract Thinking, Team Collaboration, Documentation, Leadership, Management

AWARDS AND ACHIEVEMENTS

- Achieved **2nd Runners Up** Position in JU Innov8'24 – a national level Hackathon with **280+ teams**.
- Achieved **Top 500 finalist** position in **Amazon ML Challenge** among **80,000+** participants nationwide.
- Secured recognition in **Kaggle competitions**, leveraging **ML/AI models** & solutions for real-world problems.
- Contributed in **open-source projects** and was part of **AWS Cloud Clubs** and **DevCrest Student Community**.
- Received certificates from **Samatrix.io for Data Science and Analytics** and **GitHub Foundations Certificate**
